

Splunk Education

Knowledge is Power

Let Splunk Education Services bring power to your organisation through direct, focused training programs that enable you to get started quickly and stay relevant. We set the stage for long term success and efficiency by providing the technological background necessary to make your organisation successful from the first steps with Splunk through rolling out dashboards across your organisation. We greatly enhance the value that Splunk can bring to you and your company.

Splunk Education Services offers a number of classes, courses, programs and styles to fit just about any learning need. All of the Splunk Education Services offerings are designed for the adult to learn and combine just the right mix of technology background and hands-on exercises to keep the student on track, alert, and focused. The maximum amount of practical information is delivered in the shortest amount of time to keep your staff's downtime or out-of-office time to a minimum.

"Interaction with other students, same as being in the same classroom, I enjoy this model of class"

"Excellent course (S&R). Look forward to further training"

DNA Connect Education and Training

DNA Connect Education and Training has been delivering Splunk Education training courses since early 2010 and was recognized by Splunk Asia Pacific with the 2011 Evangelist of the Year award for training excellence. DNA Connect are an official training center for Splunk Australia.

DNA Connect Trainers are Engineers with extensive real world experience of Splunk implementations and deployments and broad industry expertise and experience.

The Instructor-led classes are available virtually or at your site. The classes are delivered live via web broadcast and have hands-on exercises through remote servers. Virtual classes are taught in six-hour segments including breaks, so you can keep up with your day job, or spend time on extra lab work.

"Great comms from the instructor in delivering course"
